

Kodiak Connected Applications

Kodiak Scheduled Conference – Scheduled Dial-in and Dial-Out Conferencing

The Kodiak Scheduled Conference application allows users to schedule both dial-in and dial-out conference calls, directly from their mobile handset. With Kodiak Scheduled Conference, wireless users can schedule conference calls with up to thirty participants to any combination of wireless, wireline or VoIP numbers. Call participants are sent an SMS notification with all of the conference details, which allows them to join the call directly from the text message or easily re-join the conference in case of a missed or dropped call. Kodiak Scheduled Conference provides end users with a variety of convenient conferencing features including mid-call addition or dropping of participants, auto-authentication of conference attendees and the ability to see who else has been invited to join the conference.

FEATURE OVERVIEW

- Schedule dial-in and dial-out conference calls with up to thirty participants, to any combination of dialable wireless, wireline or VoIP numbers
- Attendees can click to join the conference call or re-join the call from an auto-generated SMS notification
- All conference call attendees are auto-authenticated; call originator can establish a leader code
- Dial-out option enables attendees to be automatically called at conference start time
- Supports mid-call addition and dropping of call participants
- Call originator can view list of participants on the call
- Available on the following Open OS clients: BREW, Java, Symbian, and Windows Mobile

THE KODIAK CONNECTED DIFFERENCE FOR END USERS

Flexible – Call organizers can choose to schedule either dial-in or dial-out conference calls

Simple – No special conference bridge numbers or PINS required

Efficient – Conference participants can be selected directly from the native phonebook

Device Independent – Kodiak Scheduled Conference calls can be made to any dialable phone number

THE KODIAK CONNECTED DIFFERENCE FOR WIRELESS OPERATORS

Clientless and Client-Based Options – Kodiak Scheduled Conference is available in both clientless and client-based user interfaces, helping to speed end user adoption and increase operator revenue.

Community Building – Kodiak Scheduled Conference can support multiple participants, which provides the flexibility necessary to conduct business or just stay in touch with family and friends. The scalable nature of this mobile conferencing application helps drive group-oriented communications on a frequent basis.

Privacy Protection – All call participants receive an invitation to the Kodiak Scheduled Conference and have the option to accept or decline the request to join the call. This privacy option is beneficial to all call participants and encourages application use, helping to drive usage and ARPU.

Integrated Applications – Kodiak Scheduled Conference seamlessly integrates with other applications, allowing users to choose how and when they want to communicate with members of their contact list.

Mobile Phone Book – Kodiak Scheduled Conference leverages the convenient Kodiak contact and group management interface that simplifies the addressing, organization, and identification of conference participants.

Multi-lingual Support – Kodiak Connected Applications can support multi-lingual requirement to address global and regional market demands.
